

FloodBreak

REVOLUTIONARY FLOOD CONTROL

PERIMETER FLOOD PROTECTION

PASSIVE AUTOMATIC FLOODGATES

NO PEOPLE, NO POWER. 24/7 FLOOD PROTECTION.

PROVEN PROTECTION

FloodBreak has provided passive flood protection to our customers since 2002. Completely passive, there is no need for human intervention or power in order for the floodgate to deploy.

We have thousands of flood barriers installed and two decades of verified flood saves around the world.

NO ADVANCED FLOOD WARNING REQUIRED TO ACTIVATE

HOW PASSIVE WORKS

Our system uses hydrostatic pressure created by the rising flood waters to automatically lift the gate upwards.

When the flood recedes, the gate automatically returns to its hidden position beneath the ground, allowing pedestrian and vehicular traffic to resume.
